Dear Customer,

This is your true-up statement for your PG&E Net Energy Metering account with an interconnected solar (photovoltaic) or wind generator.

This lists your total cumulative energy charges/credits(-) for this true-up period including any current month energy charges/credits(-). If you have any net annual charges as listed below, you will also see these on your current monthly blue bills. Any excess energy credits for the true-up period will not be applied to your next true-up period. The net metering program was designed by the legislature for systems sized to customer load on an annual basis; currently approved tariffs and legislation provide that no credit be carried forward to the next true-up period.

Any payments you may have made are reflected on your monthly blue bills. Excess payments you have made over this true-up period will be applied toward your future bills.

**TOTAL TRUE-UP BILLED AMOUNT: \$8.65\***

\*This amount includes True-up Energy charges and current month's billed amount and is reflected on your regular monthly blue bills. It includes the following components: Transmission \$17.43, Distribution \$5.89, Public Purpose Programs \$0.07, DWR Bond Charge \$7.62, On-Going CTC \$9.19, Energy Cost Recovery Amount \$4.32, Generation \$-36.62, Energy Commission Tax \$0.36 and Utility User Tax \$0.39.

If the electric total charge on the blue bill for this month is very large, it is because you have been paying your energy charges on an annual basis. You have an option of paying your energy charges monthly in the coming year. Under the Net Energy Meter program you may pay all or part of your energy charges on a monthly basis rather than waiting until true-up bill. If you did receive a large true-up bill and would like to discuss your payment options, please call PG&E at (877) 743-4112. Thank you for doing business with PG&E.

For inquiries about your Net Energy Metering bill, please contact the Solar Customer Service Center at 1-877-743-4112.  
For all other inquiries, please call 1-800-743-5000.

<b>TOTALS</b>			52,039	52,023			-16

**CURRENT MONTH METER INFORMATION:**

METER BADGE ID	SEASON	PRIOR READ	CURRENT READ
1003193632	Summer	52,039	52,023
<b>TOTALS</b>		52,039	52,023

Off-Peak is not an actual meter read. Your meter displays the peak read and the total read. The off-peak "read" provided on your bill is calculated as follows: Off-Peak Read = Total Read - On-Peak Read. If this is a seasonal cross-over month (May or November), this calculation will be completed for both seasons by prorating the data from your meter.

**CURRENT MONTH BASELINE QUANTITY INFORMATION:**

DESCRIPTION	SEASON	RATE EFFECTIVE DATE	RATE DAYS	UNITS	DAILY BASELINE QUANTITY	MONTHLY BASELINE QUANTITY
B Units	Summer	05/01/09	30	1	12.10	-363.000
<b>TOTAL</b>						-363.000

Baseline Quantity = Rate Days / Season Days x Units x Unit Rate

\*\*Energy Charges/Credits (-) include all energy related amounts and taxes. Any negative amounts shown in the "TOTALS" row will not be applied to your next true-up period. This is because the net metering program was designed by the legislature for systems sized to customer usage on an annual basis. Currently approved tariffs and legislation provide that any financial credit associated with the program be used to offset current year bills, but neither result in a negative annual bill, nor be carried forward from one year to the next.
